Медицина надзвичайних ситуацій = Medicine of emergency situations : textbook for stud. of higher med. institutions / Chaplyk V. V., Oliynyk P. V., Omelchuk S. T., Humenyuk V. V. – 2nd ed. – Vinnytsia : Nova Knyha, 2020. – 376 p. : il.

ISBN 978-966-382-747-6

The textbook covers the basic principles of organizing medical aid to population under conditions of elimination of aftereffects of emergency situations of natural, technogenic and socio-political origin. Issues considered here concern main principles of the International Humanitarian Law, organization and functioning of the Ukrainian Disaster Medicine Service. The book also deals with basic principles of organizing medical-and-evacuational, sanitary-and-hygienic, and antiepidemic assistance to population under conditions of elimination of aftereffects of emergency situations.

The textbook is designed for students of higher medical educational establishments and doctor-interns of faculties of post-diploma training of higher medical educational establishments
