M 54 Methods of examination of a surgical patient / Edited by prof.
M. A. Lyapis. – 2nd edition, unchanged. – TSMU, 2016. – 156 p.

The questions of propaedeutics of surgical diseases studied at the General Surgery Department are reflected in this manual.

A special attention is paid to the methods and procedures of clinical examination of a patient in the surgical clinic. It also contains the methods of examination of patients with hernia of the abdominal wall, acute abdomen and purulent-inflammatory processes.

This manual is intended for the students of higher medical institutions of the III-IV degrees of accreditation.
