*Recommended by the High Scientific Board of Odessa National Medical University,
as a textbook for 1st year students of medical and pharmaceutical faculties of higher educational
establishments of Ukraine (Report No 4 of November 21, 2018)*

Authors:

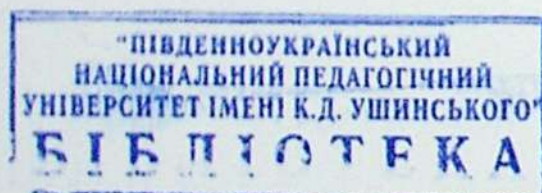

**Bazhora Yu. I., Bulyk R. Ye., Chesnokova M. M., Shevelenkova A. V.,
Smetyuk O. O., Lomakina Yu. V.**

Reviewers:

Z. D. Vorobets, Head of the Department of Medical Biology, Parasitology and Genetics of the Danylo Halytskyi Lviv National Medical University, Doctor of Biological Sciences, Professor.

O. A. Slusarev, Head of the Department of Medical Biology, Microbiology, Virusology and Immunology of the Donetsk National Medical University, Candidate of Medical Sciences, Docent.

O. A. Raksha-Slusareva, Professor at the Department of Medical Biology, Microbiology, Virusology and Immunology of the Donetsk National Medical University, Doctor of Biological Sciences.

Медична біологія = Medical Biology : textbook / Bazhora Yu. I.,
М42 Bulyk R. Ye., Chesnokova M. M. [et al]. – Vinnytsia : Nova Knyha, 2018.
– 448 p. : il.
ISBN 978-966-382-722-3

The basic questions of general and medical biology are highlighted in this textbook. The general laws of life, the study of the cell including fundamentals of the human cytogenetics, the study of heredity and variability including the human genetics, laws of phylogenetic development of organisms, fundamentals of general parasitology, biology of the most meaningful human parasites, way of transmission, diagnosis and prophylaxis of parasitogenic diseases are presented. The content of textbook is organized according to the Program on Medical Biology for the first year English-speaking medical students.

УДК 57:61(075.8)

CONTENS

PREFACE	6
Chapter 1. Introduction into the course of medical biology. Levels of organization and fundamental characteristics of living matter. Chemical composition of the cell	1.1. Introduction into the course of medical biology 7 1.2. Levels of organization and fundamental characteristics of living matter 9 1.3. Chemical composition of the cell 12 Tasks & Questions 17
Chapter 2. Classification of living organisms. Non-cellular and cellular organisms. Prokaryotic cell	2.1. Non-cellular infectious particles. Viruses, viroids, prions..... 19 2.2. Cellular organisms. Prokaryotic cell..... 21 Tasks & Questions 24
Chapter 3. Morphology of the eukaryotic cell	3.1. Structural components of eukaryotic cell. Cell membrane..... 27 3.2. Cytoplasm. Cell organelles 32 3.3. Nucleus. Human karyotype 37 Tasks & Questions 46
Chapter 4. Organization of information and energy flow in the cell. Molecular basis of heredity	4.1. Notion of cell metabolism. Assimilation and dissimilation 49 4.2. Information flow. Molecular basis of heredity. Nucleic acids..... 50 4.3. Gene and its structure. Genetic code 59 4.4. Expression of genes. Protein biosynthesis..... 62 4.5. Regulation of gene expression in prokaryotes and eukaryotes..... 66 4.6. The human genome..... 69 4.7. Energy flow in a cell..... 73 Tasks & Questions 74
Chapter 5. Reproduction on the cellular and organismic level	5.1. Mitotic cycle. Mitosis, Cell death..... 77 5.2. Mitotic cycle regulation. Genetic basis of tumour growth 85 5.3. Meiosis..... 90 5.4. Organisms reproduction..... 95 5.5. Gametogenesis. Fertilization 98 5.6. Cloning of organisms..... 107 Tasks & Questions 109

Chapter 6. Human ontogenesis. Prenatal and postnatal periods of ontogenesis	6.1. Ontogenesis. Embryonic period of ontogenesis.....	112
	6.2. Critical periods of embryogenesis. Congenital defects.....	128
	6.3. Postnatal period of ontogenesis.....	130
	6.4. Aging and death.....	138
	6.5. Regeneration and transplantation.....	141
	6.6. Homeostasis. Biological rhythms.....	146
	Tasks & Questions	151
Chapter 7. Regularities of heredity in human	7.1. Mono- and dihybrid cross. Mendel's laws.....	154
	7.2. Multiple alleles. Blood groups. Immunogenetics.....	161
	7.3. Allelic and non-allelic gene interactions.....	172
	7.4. Chromosomal theory of heredity.....	176
	Tasks & Questions	188
Chapter 8. Variation, its forms and manifestation	8.1. Phenotypic variation.....	193
	8.2. Genetic variation. Recombination and mutations.....	194
	Tasks & Questions	200
Chapter 9. Methods of human genetics	9.1. Peculiarities of human genetics. Notion of hereditary disorders.....	204
	9.2. Pedigree analysis (genealogic method).....	205
	9.3. Twins method of genetics.....	209
	9.4. Cytogenetic methods. Chromosomal disorders.....	212
	9.5. Single gene disorders. Biochemical method of medical genetics. DNA diagnosis.....	220
	9.6. Population statistic method.....	227
	9.7. Prophylaxis of hereditary disorders. Genetic counselling. Prenatal diagnosis.....	233
	Tasks & Questions	235
Chapter 10. General notions of parasitology. Protists as human parasites	10.1. General notions of parasitology.....	239
	10.2. General characteristic of protists. Parasitic amoeboid protozoa.....	242
	10.3. Parasitic Ciliates.....	248
	10.4. Parasitic Flagellates.....	250
	10.5. Apicomplexa parasites.....	260
	Tasks & Questions	270

Chapter 11. Helminthes. Flat worms and round worms as human parasites	11.1. General characteristics of flat worms, Flukes (Trematodes).....	275
	11.2. Tapeworms (Cestodes) as human parasites	289
	11.3. General characteristics of Roundworms (Nematodes). Roundworms – geohelminthes.....	304
	11.4. Roundworms – biohelminthes.....	315
	11.5. Methods of laboratory diagnosis of helminthoses.....	324
	Tasks & Questions	332
Chapter 12. Arthropodes as poisonous animals, vectors and agents of human diseases	12.1. General characteristics of Arthropods.....	337
	12.2. Medical importance of Crustaceans and Arachnida. Spiders and ticks.....	338
	12.3. General characteristic of Insecta. Insects as vectors and agents of human diseases.....	347
	Tasks & Questions	362
Chapter 13. Evolution theory. Phylogenesis of organ systems in Vertebrates	13.1. Evolution theory.....	366
	13.2. Phylogenesis of organ systems in chordates.....	375
	Tasks & Questions	395
Chapter 14. Ecology. Biosphere as human environment. Poisonous organisms	14.1. Ecological factors. Ecosystems.....	398
	14.2. Ecological systems. Biosphere	404
	14.3. Human ecology.....	408
	14.4. Poisonous organisms.....	414
	Tasks & Questions	427
