G36 **General and Clinical Pathophysiology** /edited by Anatoly V. Kubyshkin, Anatoly I. Gozhenko. – Third edition. – Vinnytsia : Nova Knyha. – 2017. – 656 p.

ISBN 978-966-382-644-8

The proposed textbook on Pathophysiology for English studying students contains information selected according to the pathological physiology program for students of medical universities. The textbook is written to help students in their independent studies on Pathophysiology and to understand the material on pathological processes development. The material provided in the textbook is adapted to the credit-module system of training and will help to increase knowledge of mechanisms of typical pathological processes at the molecular, organ and systemic levels. There are new materials of national and foreign pathological physiology in the book. The textbook is recommended for training medical students of all medical university faculties. It can also be offered for use in preparing doctors, interns, aspirants, postgraduate students, and may be useful to physicians of all specialties at any stage of postgraduate education.

CONTENTS

Preface	6
List of main abbreviations	8
PART I. GENERAL PATHOPHYSIOLOGY	11
UNIT I. GENERAL NOSOLOGY, ETIOLOGY AND PATHOGENESIS	12
Chapter 1. Foundation Concepts of Pathophysiology. Health and Disease	12
Chapter 2. Pathogenic Action of Environmental Factors	29
Chapter 3. The Role of Heredity and Constitution (Somatotypes) in Pathology	86
UNIT II. MECHANISMS OF TISSUE AND CELLULAR INJURY	105
Chapter 4. Typical Disorders of the Peripheral Blood Flow	105
Chapter 5. Hypoxia	121
Chapter 6. Cell Pathophysiology	134
Chapter 7. Pathophysiology of Tissue Growth. Neoplasia	166
UNIT III. INFLAMMATION AND IMMUNE DISORDERS	184
Chapter 8. Pathophysiology of Inflammation	184
Chapter 9. Reactivity and Resistance. Immune Response	209
Chapter 10. Pathophysiology of the Immune System	226
Chapter 11. Pathophysiology of Thermoregulation. Fever	257
UNIT IV. PATHOPHYSIOLOGY OF METABOLISM	281
Chapter 12. Pathophysiology of Energy and Protein Metabolism. Starvation	281
Chapter 13. Alterations in Carbohydrate Metabolism. Diabetes Mellitus	294
Chapter 14. Pathophysiology of Lipid Metabolism. Atherosclerosis	322
Chapter 15. Pathophysiology of Water and Salt Metabolism	333
Chapter 16. Pathophysiology of Acid-Base Balance	343
Chapter 17. Pathophysiology of Calcium and Phosphate Homeostasis	348

PART II. PATHOPHYSIOLOGY OF ORGANS AND SYSTEMS	361
UNIT V. PATHOPHYSIOLOGY OF HEMATOPOIETIC FUNCTION	362
Chapter 18. Disorders of Total Blood Volume and Hematocrit	362
Chapter 19. Red Blood Cell Disorders	371
Chapter 20. White Blood Cell Disorders	410
Chapter 21. Neoplastic Disorders of Hematopoietic Function	421
Chapter 22. Pathophysiology of Blood Coagulation	444
UNIT VI. PATHOPHYSIOLOGY OF CARDIOVASCULAR AND RESPIRATORY SYSTEM	460
Chapter 23. Disorders of Cardiac Function. Heart Failure	460
Chapter 24. Disorders of Blood Pressure Regulation	478
Chapter 25. Cardiac Conduction and Rhythm Disorders	489
Chapter 26. Pathophysiology of the Respiratory System	500
UNIT VII. PATHOPHYSIOLOGY OF GASTROINTESTINAL AND RENAL FUNCTION	520
Chapter 27. Pathophysiology of the Digestive System	520
Chapter 28. Pathophysiology of Hepatobiliary Function	546
Chapter 29. Renal Pathophysiology	566
UNIT VIII. PATHOPHYSIOLOGY OF ENDOCRINE AND NEURAL FUNCTION	588
Chapter 30. Pathophysiology of the Endocrine System	588
Chapter 31. Pathophysiology of the Nervous System	627
UNIT IX. PATHOPHYSIOLOGY OF EXTREME CONDITIONS	641
Chapter 32. Pathophysiology of Shock and Extreme Medical Conditions	641
