Annotation

To the manual for practical lessons "Hygiene and ecology"

This manual was prepared by the members of hygienic departments of National O. O. Bohomolets medical university and leading hygienists of higher medical educational institutions of Ukraine under general editorship of Corresponding member of AMS of Ukraine, professor V. G. Bardov, who heads the leading department of Ministry of Public Health of Ukraine on general hygiene and human ecology.

Theory, methods and means for the environment research and their impact on the health of healthy or ill humans and public (social) health, and also on living and labour conditions, rest, education, nutrition, training, treatment etc. are represented in this manual at the up-to-date level.

The manual includes all main sections on general hygiene and human ecology: propedeutics to hygiene, municipal hygiene, hygiene of nutrition, labour, children and adolescents, hygiene of patient care institutions, radiation hygiene, hygiene of emergency situations, tropical hygiene, personal hygiene, psychohygiene, human ecology.

The manual has been edited in compliance with the study discipline "Hygiene and Ecology" syllabus and according to the requirements of Bologna process.

Preventive priorities of the doctors' activity are taken into consideration in this manual.

The authors of the manual proceeded from the requirements on teaching; new creative accent on students' self-training; necessity of the transition to the European principles of study and control of theoretical knowledge, abilities and practical skills, basing on the longstanding experience of teaching this discipline and its separate sections at higher medical educational institutions of Ukraine.

For the students of higher medical institutions of the III-IV accreditation levels, doctors-interns and practical doctors.
