О-75 **Basics of Medical Terminology = Основи медичної термінології** : підручник / [Sodomora Pavlo, Smolska Larysa, Belayeva Olena et al.]. – Vinnytsia : Nova Knyha, 2020. – 264 pp.
ISBN 978-966-382-842-8

This textbook is intended to acquaint students with medical terminology and scientific vocabulary in order to obtain the knowledge of Greek, Latin, and English medical terminology and to review the material of professional matters. The aim of the book is to fill the need for applying obtained skills in further studying at higher medical educational institutions and at a future work-placing. The textbook helps students develop and train basic lexical and grammatical skills required for the effective performance during the Medical Licensing Examination STEP 1 and the exam in English as the part of State Qualification Examination. Can be used by English-speaking as well as by Ukrainian students.
