MEDICAL INFORMATICS

TEXTBOOK

Fourth edition

RECOMMENDED
by the Ministry of Health of Ukraine
as a textbook for students of higher medical
education establishments

Kyiv
AUS Medicine Publishing
2018

UDC 61:004(075.8)
LBC 5.73fya73
M42

Recommended
by the Ministry of Health of Ukraine as a textbook
for students of higher medical education establishments
(letter No. 08.01-22/79, 22 January 2008)

Reviewers:

O.P. Mintser — Doctor of Medical Sciences, Professor, Head of the Chair of Medical Informatics of P.L. Shupyk National Medical Academy of Postgraduate Education, Honored Worker of Science and Engineering of Ukraine;

Y.V. Kozachenko — Doctor of Physics and Mathematics Sciences, Professor of the Chair of Theory of Probability, Statistics and Actuarial Mathematics of Taras Shevchenko National University of Kyiv

545276

M42 **Medical** Informatics : textbook / I.Ye. Bulakh, Yu.Ye. Liakh, V.P. Martseniuk, I.Yo. Khaimzon. — 4th edition. — Kyiv : AUS Medicine Publishing, 2018. — 368 p.

ISBN 978-617-505-685-1

The textbook is based on the new version of the curriculum of the discipline *Medical Informatics* for the specialties *Medical Care*, *Pediatrics*, *Medical and Preventative Care* adjusted for the credit-module system requirements. The textbook structure allows using it both in traditional and distance learning. Each chapter ends with a summary and self-control questions.

The textbook is intended for students of higher medical education establishments.

CONTENTS

INTRODUCTION **8**

SECTION 1
INFORMATION TECHNOLOGY IN HEALTH CARE **9**

1.1. Basic Concepts of Medical Informatics **9**

Information and Its Definition 10
Transmission of Information. The Scheme of Information Transfer. Sender, Channel and Receiver .. 13
Message Carriers 17
Determination of Information Content 18
Presentation of Information in Computer 22
Subject and Object of Medical Informatics 26
Medical Information and Its Types 29
Information, Data and Knowledge 29
Description of Data: Qualitative, Ordinal and Quantitative Data 35
Medical Data 38
Self-Control Questions 39

1.2. Network Technology **41**

Basic Concepts of Computer Networks 41
Classification of Computer Networks 42
The Global Network Internet and Its Possibilities 45
Self-Control Questions 58

1.3. Health Care Information Resources **59**

Fundamentals of Telemedicine 59

Evidence-Based Medicine.
Principles of Evidence-Based Medicine 65
Self-Control Questions 91

SECTION 2
COMPUTER DATA AND METHODS OF THEIR ANALYSIS 93

2.1. Database Management Systems 93

Basic Concepts of Databases 93
Classification of Databases 97
The Main Types of Data Models 99
Classification of Modern Database Management Systems 106
Linguistic Means of Database Management Systems 107
The Future of Database Management Systems 109
Self-Control Questions 110

2.2. Coding and Classification 111

What Is Classification? 111
Classification Systems in Ukraine 125
Self-Control Questions 126

2.3. Visualization of Biomedical Data 127

Formation of Medical Images: from Physiology to Information Processing 127
Medical Image as an Object of Medical Informatics 129
Methods of Obtaining Medical Images 131
Processing of Medical Images 133
Self-Control Questions 147

2.4. Methods in Biostatistics 148

Modern Technology of Data Analysis 148
Estimation of Distribution Parameters and Verification of Hypotheses 159
Regression Analysis 169
Self-Control Tests 171

2.5. Biosignals and Their Processing 176

Stages of Biosignal Analysis 177
Biosignals and Nonstationary Signals 178
Types of Signals 179
Analog-to-Digital Conversion 181
Self-Control Questions 184

SECTION 3
MEDICAL KNOWLEDGE AND DECISION MAKING 186

3.1. Formalization and Algorithmization of Medical Problems 186

Basic Concepts 186
Types of Algorithms and Their Flowcharts 189
Self-Control Questions 195

3.2. Formal Logic in Biomedical Problem Solving 196

Fundamentals of Propositional Calculus 196
Logical Operations and Truth Tables 198
Presentation of Logical Functions 204
Self-Control Questions 205

3.3. Logical and Probabilistic Models for Disease Diagnosis 206

Types of Diagnostic and Prognostic Technologies 206
Types of Medical Logic 206
Application of Probabilistic Logic in Diagnosis 215
Self-Control Questions 222

3.4. Modeling of Medical and Biological Processes 224

The Concept of System 224
The Concept of Model. Types of Models 227
Mathematical Modeling 232
Examples of Mathematical Models 233
Self-Control Questions 246

3.5. Knowledge Systems. Expert Systems 247

Knowledge Systems Architecture 247
Expert Systems in Medicine 249
Formal Models of Knowledge Visualization 257
Characteristics of Expert Systems 263
Examples of Expert Systems 264
Trends of Knowledge Systems Development 265
Self-Control Questions 266

3.6. Neural Networks 268

Basic Concepts 268
Neural Network Models 273
Neural Network Construction Algorithm 280
The Technique of Neural Network Construction in NEUROPRO 0.25 281
Self-Control Questions 288

SECTION 4
HEALTH CARE INFORMATION SYSTEMS 289

4.1. Medical Information Systems 289

Information Requirements 289
Classification of Medical Information Systems 297
Territorial and State Level Medical Information Systems 308
Self-Control Questions 310

4.2. Medical Device-Computer Systems 312

The Concept of Device-Computer Systems 312
Basic Principles of Medical Device-Computer Systems ... 315
Functional Diagnosis Systems 320
Monitoring Systems 329
Treatment Management Systems 331
Self-Control Questions 333

4.3. Hospital Information Systems 335

Types of Systems 335
Display of Scenario of Hospital Information Events 336
Hospital Information System Architecture 337

Electronic Medical Card 340
Hospital Document Management System 344
Self-Control Questions 348

4.4. Ethical and Legal Principles in Health Care 349

Protection of Medical Information 349
Organization of Medical Secrecy Protection 351
Threats to Confidentiality of Medical Records 352
Complex Protection Systems Implementation 353
Self-Control Questions 359
